LANGUAGES

English – fluent writing and speaking

Polish – native

INTERESTS

I'm active runner competing in marathon and halfmarthon runs and also spectator of many disciplines like tennis, football, and motorsports.

I like listening to podcasts, collecting old books and newspapers about sports in English, for constant contact and improvement of language skills.

PORTFOLIO

Please visit my **web application**, designed with use of all my major programming skills..

'**pyBreak**' is the project based on collecting data about tennis, which are presented in the form of web application created in **Django** framework. Website's backend was prepared in **Python 3**, using its libraries, which are helpful in areas of data scraping and data cleansing. Backend's data is stored in **SQL** tables, and presented in the frontend output, created in **HTML 5** templates with style customized by **Bootstrap 4** and **CSS 3**.

SKILLS

💻 **TECHNICAL**

- ➢ **Python 3 –** data analysis with use of Python language – its libraries and modules useful for data scraping (Selenium/BeautifulSoup), data collection and processing (Pandas/NumPy). I have knowledge about OOP and I'm capable to deliver my job in form of user-friendly application for the client.

- ➢ **Web development** - Django framework knowledge with some HTML/CSS/Bootstrap skills, allowing to create frontend website's output.

- ➢ **SQL –** basic SQL queries knowledge, especially in SQLite3. I'm constantly learning some new skills in area of MySQL and PostgreSQL in goal to be more proficient in data management.

💬 **SOFT SKILLS –** Fast learner, multi-tasker, flexibility in tools usage, open and communicative in working with the team and clients.

CODING WORK EXPERIENCE

Python Developer, 2019 – current

Process automation by creating tools and apps for client's use. Improving reporting processes and optimizing the user's work with data systems. Facilitating of user's work related with data optimization. I'm creating automation tools which map user's behavior and reduce their manual effort. Work on the basis of close cooperation with clients and dynamic adaptation to business needs. During my work, I have managed to help the client reduce costs up to 1 FTE per month.

EDUCATION

Master's Degree:
Finance and Accounting (2020) with Accounting Bachelor's degree (2018).
